Lanchester Pony Club Gets Ready For May 6th Show

On Saturday, May 6 many children and their mounts, she adds

Lancaster and Chester County youngsters with horses or ponies, will be heading for Quarryville for the Junior Horse Show

The show which will get under way at 9 a.m., is being sponsored by the 43-member Lanchester Pony Club of southern Lancaster and Chester counties, and will be held on the Quarryville Community Grounds

All junior horsemen, 18 years of age and under, are eligible to compete in this open show, according to pony club district commissioner Mrs G W Hassler II, of Quarryville area.

The club hopes that revenue earned through this show — from entry fees and program advertising — will help to finance a permanent cross-country course for training the

22 CLASSES

"We have tried to provide classes for all levels of riders" Mrs Hassler notes Classes will include lead line, for children under six years of age, two, walk-trot classes for 10 years and under, and 11-14 years of age; two classes, maiden horsemanship (those riders who have never won a blue ribbon) —under 14 years and 14-18, maiden horses, for horses never having won a blue ribbon maiden ponies and there will be five divisions offering championships — small pony, large pony, junior hunter, horsemanship 14 years and under, and horsemanship 14-18 years of age

Mrs Hassler notes there will be two rings working at the same time to accommodate the

UP AND OVER goes Pam Hassler, Quarryville R2, and her mount Lady Dee at the last Regional Pony Club rally. Miss Hassler is a member of the "C" team of the Lanchester Pony Club.

Fight To Retain Handler Pool Is Finished, Area Dairymen Told

The fight to retain a handler pool in the Delaware Valley milk marketing area has been lost Dr Paul E Hand, Inter-State Milk Producers Cooperative economist told some 200 area dairy farmers Thursday night

"We're the last major handler pool in the country, and although it took them (federal government) a long time to get us, they finally cut us down.

"The problem now is to determine what we can salvage out of this to make it one of the best paying market pools in the country," Hand explained

The meeting, held in the Guernsey Sale Pavilion was called to give farmers the details on the final decision of the U S Department of Agriculture, changing the Delaware Valley milk marketing area from a handler to a marketwide pool

After reviewing this final decision, Hand discussed the advantages and disadvantages to Philadelphia shippers of a "yes" or "no" vote in the referendum now being conducted

The decision was issued April 7 with a 30-day period provided for referendum

TO BE SWALLOWED BY N.Y.

"How long will it be before the N Y order swallows us up?" one dairyman asked Hand

"Well, they're trying right now" the economist noted, "but they've got some prob-

Tobacco Tops Crop Insurance Coverage

Crop-hail insurance protection has doubled over the past 15 years, keeping pace with increasing costs of production and values of harvests, according to a report published by the U.S. Department of Agriculture.

Of all major commodities, tobacco has the largest proportion of the crop insured against hail damage, about one-third. Some one-fourth of the wheat crop is insured

Rural Life Sunday Observation April 30

The fifth Sunday after Easter is often referred to as Rural Life Sunday or Rogation Sunday This is a day set apart for emphasizing the meaning of Christianity for rural life, notes associate agricultural agent Wm Merriam

On April 30th at 7 00 p m. a Rural Life Sunday Service will be held by the youth of Bethany United Church of Christ in Ephrata This will be held at Old Bethany which is located just off the Bethany Road leading from Route 222 in Akron towards Murrell Additional facts may be secured by contacting Mrs. Paul S Schantz, R D 1, Ephrata

A special service will be held on April 30th 7:30 p m at the Stevens Hill Church of the Brethren The main speaker for this event will be Norman Rebert editor of the Pennsylvania Farmer magazine

Everyone is invited to attend, especially young folks in 4-H and FFA activities These Services are open to the public and all are welcome, Merriam said

Grangers Oppose Constitutional Conv.

At its spring meeting at the White Horse Fire Hall last Saturday, the Lancaster County Pomona Grange #71 went on record opposing the proposed constitutional convention question which will appear on the ballot during the May 16 primary election.

Agricultural Land In River Basin Must Be Preserved For Future Use

HARRISBURG — River basin studies being made in the state must include plans for preservation of land "highly suited for agricultural use," the Pennsylvania Association of Soil and Water Conservation District Directors urged Wednesday

"Pennsylvania land resources are not inexhaustible," the organization pointed out in a series of recommendations relating to river basin studies

"It is apparent that plans should be made to preserve our better agricultural land for future production. Whenever practical, plans should call for recreational developments, industrial development, and housing developments on land of relatively low value for agriculture."

In presenting a committee report on the recommendations, Raymond D Shaffer, of Dalmatia, Northumberland County, pointed out that land will be vitally needed in the future to produce enough food for the rapidly growing population "in this country and elsewhere in the world."

The association's executive council, in addition to calling for plans to preserve agricultural lands recommended that river basin studies must consider

Present and future water

(Continued on Page 13)

Weather

Temperatures for the period Saturday through Wednesday are expected to average below the normal range of 66 to 44 degrees.

Precipitation may total ½-inch, occurring as showers Saturday and again about Tuesday.

Earl Hess Named PENB Chairman

Earl L. Hess

Earl L Hess, president of Hess Bros. Farms, Inc., Ephrata was unanimously named chairman of the Poultry and Egg National Board at the organization's annual membership meeting held last week in Chicago.

Hess, who had previously been PENB first vice president, succeeds Dr John Salsbury in the chairman's post

Also attending the annual session in Chicago was K. M. Souders, manager of Producers Cooperative Exchange, Coatesville He is a PENB state director, representing the Pennsylvania Poultry Association, and served as a member of the nominating committee.

It was also reported at the

Weekly Poultry Report

Eastern Pennsylvania And New Jersey
WEEKLY SUMMARY

LIVE HENS

Prices for light hens remained unchanged. Prices at high side of range reflect flocks subject to full condemnation deductions. Off farm movement light in N.J. and moderate in Pa. Processors received heavy volume shipments from points in New York State. There were too few sales to report prices on heavy hens. Offerings were limited in some instances, but freely made in others. Advices indicate weak market conditions being experienced for broiler chicks has caused some unsettledness. Demand light as buyers take a wait and see attitude immediately prior to religious holy day weekend. Prices paid at farm: Light hens 5-6¾, mostly 5½-6½c; Heavy hens, too few sales to report.

Fogelsville

April 18, 1967

(Prices paid dock weights, cents per pound, except where noted.)

Hens, Light 6-10½, mostly 6 6½; Hens, Heavy 8-20½, mostly 15-18; Pullets 15½-40, mostly 33-39; Roasters 16-32, mostly 25-32; Rabbits 44-53, mostly 49-53; Guineas 82½; Pigeons (per pair) 85-160, mostly 85-95; Jumbo Squab 90.

Total coops sold 525.

Eastern Shore Exchange
WEEKLY SUMMARY

Lot-average broiler and fryer live prices dropped more than one-cent this week to average 15.40 cents per lb.

Prices paid during the week ranged from a low of 14.0 cents per lb. on Monday to a high of 16.7 cents on Tuesday

Sales for the week totaled 769,100 head, down 75,000 head from the preceding week.

From Where We Stand . . .

Farm Safety Every Week!

Everything seems to have its national week of recognition, as for example, Farm Safety Week will be celebrated July 23-29 this year.

How many farmers, we wonder, will not be around to observe that week because they needlessly neglected sound safety sense between now and then?

It is a simple thing to point out a person's mistake after that mistake has resulted in an accident. Hindsight, being as perceptive as it is, can quickly show us our mistakes. But only foresight can help us avoid them and foresight means using what we already know.

Editors, commentators, and others can talk farm safety until eternity, but talk can't avoid accidents It is **not** a lack of information that causes farmers to have accidents with their equipment or livestock. It is usually one moment of carelessness that does that job. One moment of decision in which a farmer lays aside his better judgment and does what's handy.

As a reader pointed out this week, farmers are great innovators — that is, they will try to adapt something they see, or hear about, to suit their own needs. This is good, we think, and it has led to progress in farm production. But it can also be very dangerous if mishandled.

No . . . talk and constant reminders can't create safety, although they may help if anyone will heed the advice. But, as beauty, safety is in the eye of the beholder. The person who is safety-minded will undoubtedly have a better chance of survival than the one who simply blunders along like "an accident going somewhere to happen".

Some people seem to have accidents continually. We hear them described as "accident prone". This is simply one way of saying they are people who seem to attract accidents like flowers attract bees.

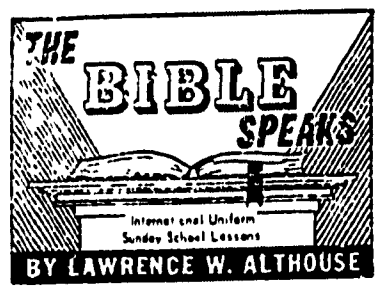
Others go through life unscathed, seemingly repelling accidents by reverse magnetism, or some other mysterious means.

If the life patterns of those to whom accidents do **not** seem to occur were studied closely, we'd bet that this ability to avoid accidents would indeed be found to be **no accident!** It would be a deliberate action — conscious or sub-conscious — that guided these non-accident prone persons through life.

Carelessness can become a habit. But, fortunately, so can safety. A person can develop the habit of avoiding "booby traps" carelessly set by others, and he can develop the habit of **not** setting up booby trap situations in which he, or someone else, may later be caught.

The nice thing about a habit is that you do it naturally, automatically. So, once you establish the safety habit it becomes constantly stronger and more automatic each time you use it. You learn to immediately recognize situations which could yield accidents, and you guide your decisions accordingly.

So, if you're one who seems to have more than an average share of "little" accidents, look to yourself **NOW**; don't wait until that one **big** one gets you in its sights. The time to start thinking safety is right now. Tomorrow **could** be too late!



Along the Way

Lesson for April 23, 1967

Background Scripture Acts 3
Devotional Reading Hebrews 11 32 40

A man driving on an expressway grew so impatient at what he considered to be "Sunday driving," that he purposely bumped the rear of the car in front of him to prod the slower driver. Unfortunately for the impatient motorist, a policeman saw this deliberate act and arrested him. Later, when asked by the judge why he had been in such a hurry, the man explained that he was on his way to church and didn't want to be late.

Rev. Althouse

Few of us have ever seen anyone that anxious to get to church! Yet, perhaps we do know that getting to church and going about our normal religious routine may sometimes get in the way of our living in a Christian manner along the way. This was true of the Levite and the priest who, anxious to be on their way, did not stop to help the man who had fallen victim to thieves on the Jericho road.

Peter and John had a similar challenge one day as they were on their way to the temple for prayer. A crippled man lay at one of the temple gates asking for alms. It was his only way of making a living. What should Peter and John do? If they stopped to help him, they would probably miss the service in the temple. Yet, important as that was to them, they had to stop: this is what the Master himself would do. He never let religious practices get in the way of doing the will of God.

The "will of God." Ah, there's the rub. Apparently Peter and John believed that it was God's will that this man be made whole. How could they be sure? How did they know he wasn't being punished for some special sin? Perhaps this sickness would lead him to repent or grow in faith or learn humility? Maybe the man wasn't good enough or pious enough to be helped?

Matter of Compassion

Peter and John, however, would not have been deterred by objections such as these. They had never heard Jesus pray, "If it be thy will", when he asked God to save or heal someone. They had never heard him tell someone that it would be better for his soul to remain sick a while longer. When the blind man was brough to him, they recalled, Jesus denied that it was his or his parents' sin that was to blame. He had never sent anyone away saying, "I'm sorry, you're not good enough or spiritual enough." When someone ill or in difficulty confronted him, Jesus thought of none of these. He saw only people in need and was moved by compassion.

So also were Peter and John moved by compassion to stop on their way to church and heal a crippled beggar. Yet, we might ask, if God wanted this man whole, then why didn't he just heal him without stopping these two men? Why must we ask for God's help if he already knows we need it?

Peter said, "Look at us." We often think of prayer as getting God's attention; in reality it is a matter of giving our attention to him so that he can do with us what he desires. We pray, not to persuade a reluctant God, but to submit ourselves to his will, which, Jesus made clear, includes wholeness of mind, body, and spirit.

Waiting For You

Furthermore, we must expect to receive something. This is all that faith really is. Instead of some mysterious gift of mind over matter, it is a trust in Jesus Christ. Too many try to "have faith" by gritting their teeth and clenching their fists. It is more a matter of letting go of ourselves and letting God take over.

The man asked for alms but was given something much greater. We ask for help and often fail to realize that he has answered our prayers by sending someone to help us. Perhaps today as you go about your daily work, there is someone asking God for help, someone who unknowingly is waiting for you to stop along the way.

Letters To The Editor

READER CITES NEED FOR TRACTOR SAFETY

Editor, Lancaster Farming

I'm necessarily making this brief, but that doesn't take away from the importance of the subject

On a beautiful spring afternoon this past week, a local farmer was hauling a load of fertilizer to a field on a farm he had just bought

Being 43 years of age he had some experience behind him but evidently not enough to cope with what happened That tricycle tractor flipped over on top of him resulting in his death

The report in the daily paper the next day was no more than an obituary But there was nothing in your paper. I think this warrants more attention than was given to this accident

In your paper you published a picture of a recent innovation which has a lot of engineering skill behind it (Tractor mounting to handle anhydrous ammonia tanks—L F 4/15/67) You know as well as I do that farmers, being the innovators they are, will be attempting this on their own The first thing they'll do is use what they have If it happens to be a tricycle tractor, that's what will be used Now imagine a load like that (two heavy ammonia tanks) on a tricycle tractor

If roll bars don't come as standard equipment with the applicator tank kits, the whole thing should be junked, or at least, a word of caution should be issued to wouldbe innovators

Sincerely,
Charles L Kocher

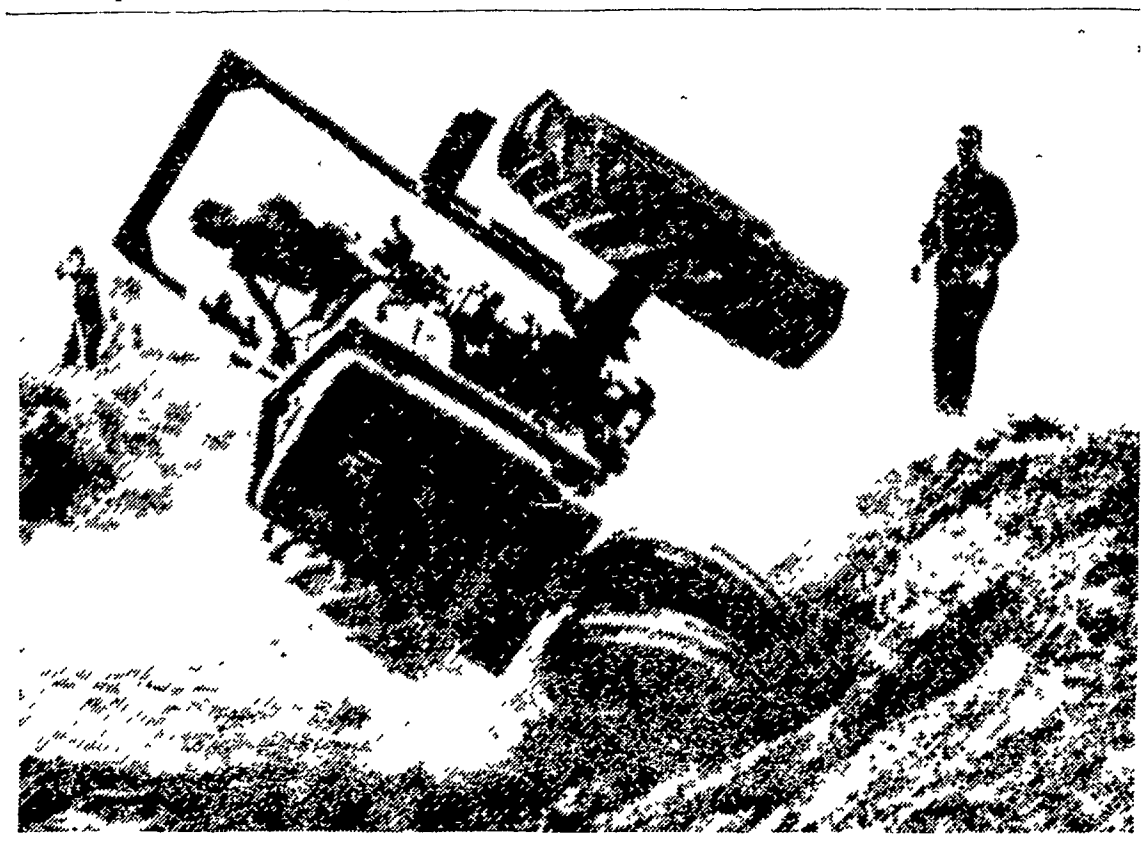
annual meeting that the Operation EGGspansion program to double the income of PENB is one-third of the way to its goal The sum of $101,000 has been raised to date, members were told PENB's current income is approximately $340,000



TESTING PROTECTIVE FRAMES at International Harvester Company includes deliberately rolling this tractor over, and electronically measuring the impact on the frame and the effect on the operator In this case a dummy is used instead of a person. Information is shared with the industry through the Farm and Industrial Equipment Institute in an effort to make the safest possible equipment.

Now Is The Time . . .

By Max Smith, Lancaster County Agent

SMITH

To Inspect Alfalfa Stands

Due to the lack of much extremely cold weather this winter, the alfalfa weevil seems to be getting a very early start, growers are already reporting damage on plants that are 5 to 6 inches tall Growers are urged to inspect their fields frequently to know of the extent of the infestation and when to apply the first sprays If the weevil are feeding nearly a month ahead of normal cutting time, serious damage will result until insecticides are applied

To Aim For Maximum Output

Today's farmers are forced to strive for maximum output from all of their farming operations As the planting season approaches, every good cultural practice known should be used to get all possible net return per acre, or per animal unit Farmers are urged to plan each operation carefully and take the time to do the job right, the cost will be nearly the same and the return should be much higher

To Check Corn Planting Rates

Corn growers are advised to take time to be sure they are planting enough kernels to give the desired stand of mature plants per acre Most plant populations are based upon the mature stalks per acre and not on the kernels dropped, allowance should be made for some not germinating, insect and bird damage, and other natural causes of plant mortality Corn for silage should be planted 4 to 5 thousand plants per acre thicker than for grain purposes.

Air pollution is becoming so dangerous that someday doctors will probably advise their patients to stop breathing it.

● Handler Pool

(Continued from Page 1)

lems of their own that are causing them concern."

He explained there were some things that should be done to improve the N.Y. pool and its utilization of Class I milk.

"This pool is a good example of what happens when you have two or three large cooperatives all competing for the same producers in a pool. They get so busy propagandizing and telling their members how much they're doing for them that they don't have time to do a better marketing job," Hand stated

In a prolonged discussion between the economist and a dairyman in the back of the room, the question why Inter-State hadn't asked the government for more than a 40-cent increase recently was raised

Hand explained that co-ops across the country were asking for the same increase, and Inter-State directors felt it represented a fair demand

"If we'd asked for more than a fair increase, and gotten it," Hand said, "we might have had the best price, but the other areas would have had the business"

BASE PLAN

"If we're going to have a marketwide pool," Hand noted, "we should have a base plan similar to the Baltimore area" He described the Baltimore base as "a very fine plan for dairy farmers" with a Class I utilization of about 92 percent.

Hand explained that when an order has a base plan, that base is reestablished for individual producers each July through December He said the advantages of such a plan protects the dairyman in the spring months if he doesn't produce more than the base established between July and December

"It won't work miracles" the economist said, "but it does help reduce seasonal price fluctuations and is better than *a blend price plan in a marketwide pool*"

To get a base plan Hand said, requires a hearing and an individual producer referendum

Although the government has already turned down Inter-State's request for a base plan, Hand said that if enough producers wanted it, the directors would probably apply for a hearing for a base plan.

He asked for a show of hands of those Inter-State members present who would approve such a move by their directors About one-third responded affirmatively But when he asked for those opposed, there was no response

YES OR NO?

"This pool change is the Secretary of Agriculture's final decision" Hand said "He deliberated for a year because of the opposition of dairymen to terminating Order 4," he added Some 4500 pages of testimony resulted from the hearings in Philadelphia in 1965, he noted

Hand pointed out that Inter-State could vote "yes" or "no" on the question of a market pool, and that farmer-directors had not yet reached a decision on which way to go.

If the order is voted out, Hand said, the New York interests could come in with a hearing proposal, and "our 4400 producers compared with their 33,000" would lack the required 25 percent to even vote

He said the "no" vote would keep the area a handler pool, but "we would have to reduce our price to combat milk coming into our area with no order to stop it"

Hand further explained that a "yes" vote would take the Delaware Valley area into a marketwide pool but added that certain maneuvering within that framework — including a base plan—could ease the price drawback

Infected and protected. The photos on the left show tomato foliage and fruit attacked and infected by late blight. The fruit and foliage on the right are strong and healthy. They were protected from fungi attack by **DITHANE® M-45,** a superior and unique fungicide. This new product chemically combines zinc, manganese and ethylene bisdithiocarbamate. It has been proved effective through extensive use on tomatoes in the United States and throughout the world. **DITHANE M-45** protects tomatoes against anthracnose, early and late blights, gray leaf mold, gray and Septoria leaf spots all season long.

Apply 1½ to 3 lbs. of **DITHANE M-45** depending on weather conditions, plant growth and extent of disease. Repeat every 7 to 10 days right up to picking time. See your dealer for full information or write to us.

Atlantic Open House To Introduce New Sire

The Atlantic Breeders Co operative plans to hold an open house on April 27 at Fan Hill Farm Chestertown, Maryland breed program director Harry F Roth announced this week

The occasion will be to give interested breeders an opportunity to see a superior Holstein sire recently purchased by ABC from Edwin Fry, owner of Fan Hill Farm

The sire, a four year old bull classified very good", is Fan Hill Ivan 'Marc' He is doing an outstanding job of transmitting exceptional production and type Roth notes

Atlantic sire committeemen directors, and technicians are urged to attend this event, and to encourage their friends and neighbors to attend, Roth states Although the planned open house is scheduled from 11 a m to 3 p m, Roth notes the parade of daughters and commentary by he and Fry will begin at 1 p m

The 175 cow, 1400-acre Fan Hill operation is located along Maryland Route 213 two miles north of Chestertown A light lunch will be available, Roth said

against hail damage. Other crops in most areas do not require such a high proportion of coverage.

The report reviews hail insurance for crops including volume of coverage kinds of crops insured and the percentage of harvest covered It lists premiums and indemnities for 1965 and tabulates comparisons of coverage dating back some 30 years

In all but three years since the 1930 s the volume of crop-hail insurance has expanded rising to a record high of $3 1 billion in 1965 Coverage in 1965 was six percent above a year earlier according to the report

The Corn Belt accounted for more than half the coverage of all U S crop-hail insurance in 1965 because the severe though infrequent, hails in the region often cause heavy damage The risk is high to both production and value of the corn crop the report notes

Don't plant for the BIRDS!

See us now for **ORTHO Bird Repellent**

Crows, blackbirds, pheasants — any bird that steals seed won't come back a second time for seed treated with ORTHO Bird Repellent. They spit it out and fly away. It's easy to get this kind of protection for your seed. All you do is pour this repellent right in with the seed in your planter box.

Actually, you're getting more than bird protection with this product. The full name is ORTHO Bird Repellent and Seed Protectant. It also contains an insecticide to control soil insects such as wireworms, seed corn maggots and corn rootworm. And a fungicide for extra protection against diseases like seedling blight, damp-off, and seed decay.

This is the only bird repellent that combines all these protections. So this year, don't plant for the birds. When you get your seed, ask us for ORTHO Bird Repellent.

PEQUEA CLUB ELECTS PEGGY ESHLEMAN PRES.

By Jeanette Shank, reporter

Although no official name has yet been selected for the 4-H club formed April 13 at a meeting of 96 interested persons at Pequea Township Elementary School, project books were distributed and the following officers were elected.

President, Peggy Eshleman, vice president, Lucy Herr, secretary, Paula Harnish; assistant secretary, Patty Eshleman, treasurer, Jeanie Harnish; song leaders, Julia Harnish, Carolyn Funk and Mike Campbell, game leaders, Mitch Huber, Laurie Schantz, and Sylvia Martin; news reporter, Jeanette Shank, county council representatives Lucy Herr, Peggy Eshleman, Sandy Fryburger, Doris Harnish, and Joni Huber.

A committee was appointed by the president to select a name for the club Serving on the committee are Donald Martin, Mike Campbell, Tim Brenisen, and Eric Eshleman.

At the close of the meeting, members made final decisions on their projects, and decided to meet at the Willow Street Community Building on May 11th.

A meeting schedule of every second Thursday in the month has been decided at an earlier meeting

Grassy Weeds Stealing Your Corn Profits?

HIRE A KILLER!

RAMROD®

Nothing can steal profits from your corn crop quite like grassy weeds . . . especially giant foxtail and other foxtails. Where these pests grow uncontrolled, corn yields are sure to drop. This year, don't let it happen to you. Hire a killer . . . Ramrod, the remarkable new pre-emergence herbicide developed by Monsanto Company to control grassy weeds before they start . . . without harm to corn, and without chemical carryover in the soil to wreck your crop rotation plans. Ramrod, the **careful** killer, stops grassy weeds during the early stage of crop growth when weed competition has its worst effect on yields. Then Ramrod disappears, leaving your fields clear of weeds and chemical. All you get is more money in your pocket at harvest. Talk to us today about Ramrod . . . best friend your corn ever had!

large number of classes Entry fee for the show is $2 if entered before May 6: $3 if not in until the show date.

Judging the 22-class, Lanchester Pony Club show will be: J. Caroll Tischinger, Cockeysville, Md., Grant Wesner, Reading, Pa., and Mrs J H Tyler McConnell, Wilmington, Del Mrs McConnell is also regional Pony Club supervisor.

NATIONAL ORGANIZATION

Although the Lanchester Pony Club is only in its 2nd year of operation, the parent national club has a history of 12 years in this country, and dates back considerably further at its point of origin in England National headquarters for the U S Pony Club is Dover, Massachusetts

The country is divided into regions, and each region into districts. Many of the districts exchange unofficial shows, Mrs Hassler explains, but there is only one official regional rally Each of the 11 clubs in this region may send five member teams to the regional rally, which will be held in late June

"One of the big accomplishments for a pony clubber," Mrs Hassler explains, "is being chosen to represent his club on a team in the regional competition." Regional winners will go on to the national rally, she adds

ROSEMARY BINKLEY riding "Ray". She is a member of the "D" group of the Lanchester Pony Club.

At the regional rally, competition is divided into five phases dressage, cross-country, stadium jumping, stable management, and a written test District teams compete only within their own ability levels

ABILITIES RATED

Four ratings described as "A, B C, or D" are assigned to all club members from the national organization They are based on the ability and accomplishment of the individual, with "A" being the highest rating given.

"There are only 61 "A's" in

● Pony Club

(Continued from Page 8)

the entire 6770-member U S Pony Club," Mrs Hassler notes.

With an average age of 8-12, none of the local club members have advanced beyond the "D" and "C" ratings. To qualify for the "B" level, a youngster must be over 14 years of age, be able to take his horse over a three and a half-foot jump, do elementary teaching, be able to ride a green (untrained) horse, and meet other high standards.

CLUB ROUTINE

The Lanchester Pony Club meets twice a month — once mounted and once unmounted (The club's name is somewhat of a misnomer since it also includes horses.)

A formal, military inspection of rider and mount precedes instruction at each of the mounted meetings, with the inspecting officer coming from outside the club Members are judged on the cleanliness of themselves, their tack, and their mounts The member scoring the highest number of inspection points in each group gets to wear a sash of pony club colors throughout the meeting.

At the unmounted meetings, youngsters receive instruction on stable management, veterinary medicine, and fox hunting in the form of lectures and films.

The goal of the voluntary leadership of the pony clubs is "to educate the children and their mounts so that each is thoroughly happy and comfortable with the other," Mrs. Hassler notes.

LEADERS

While the parents of each member automatically become sponsors, they meet annually to elect an executive committee to represent them and to handle the club's business directly. Serving on the executive committee this year are

Mr and Mrs John Henkel, Mr and Mrs John Waters, Dr and Mrs Thomas Hamill, Mr and Mrs Henry Skiles, Mr. and Mrs John Weir, and Mr. and Mrs Calvert Bryson

Serving as co commissioner with Mrs Hassler is Art Groy of Parkesburg The district commissioners are in full charge of the club, and are responsible to the regional supervisor

Any junior horseman, under 18 years of age, who wishes to compete in the May 6th show at Quarryville may enter by calling Mrs. Hassler at 786-3193 There is still time to enter, she remarked.

People seldom hate or idolize people they know very well

Guaranteed—An Empty Cookie Jar!

SPENCE

Keeping the cookie jar full of homemade cookies is a regular routine for many homemakers. The recipes we have for you today aren't going to help much if you want to keep cookies on hand We're sure these cookies will be eaten just as soon as you have them baked If you want to keep some for a later time, it might be a good idea to freeze them These Applesauce Raisin Drop Cookies are excellent for freezing They are a moist cookie and stay moist longer than average.

LEMON-CREAM CHEESE COOKIES

- 1 3-oz. pkg cream cheese, softened
- ½ cup butter or margarine
- ½ cup sugar
- 2 tablespoons grated lemon peel
- 2 teaspoons lemon juice
- 1 cup sifted flour
- 2 teaspoons baking powder
- ¼ teaspoon salt
- ½ to ¾ cup corn flake crumbs

Blend cream cheese with butter and sugar add lemon peel and juice Sift flour with baking powder and salt Gradually add to creamed mixture, beating until smooth Chill dough about one hour Shape dough into small balls Roll in corn flake crumbs. Place 1½ inches apart on ungreased cookie sheet Bake at 350 degrees, 12 to 15 minutes. Do not allow to brown, cookies should remain a delicate light color. Makes about 2½ dozen.

***BROWNED BUTTER FILLING**

- 2 tablespoons butter
- 1 cup sifted confectioners sugar
- ½ teaspoon vanilla
- 1 tablespoon light cream

In a 1-quart saucepan heat butter over low heat, stirring occasionally, until light amber color. In a small mixing bowl beat together butter and one-half of the confectioners sugar. Add vanilla and cream; then add remaining sugar and beat until smooth.

* * *

CHOCOLATE DROP COOKIES

- ½ cup (1 stick) butter
- 1 cup firmly packed light brown sugar
- 1 egg
- 1 teaspoon vanilla
- 2 cups sifted regular all-purpose flour
- ½ teaspoon baking soda
- ¾ cup milk
- 2 squares (2 oz) unsweetened chocolate, melted
- ½ cup chopped nuts

Cream together butter and sugar until light and fluffy; add egg and beat thoroughly. Add vanilla. Sift together flour and baking soda; add alternately with milk to creamed mixture beginning and ending with dry ingredients. Blend in chocolate; then nuts. Drop by tablespoonfuls onto buttered baking sheet; bake in preheated 350 degree oven 10-12 minutes. Remove to wire racks to cool. When completely cool frost with Chocolate Confectioners Icing". Yield: approximately 5 dozen.

Planning to buy a new

Tractor

See Farm Credit first for

Money

If you've been putting off buying a new tractor because you lack "tractor money", it's time to see Farm Credit. You save money with a Farm Credit loan because you pay only simple interest and only for the actual time you use the money. And your repayment is fitted to periods when you have actual farm income. Call Farm Credit now.

"Cooking Surprises" At Farm Women 3 Meeting

The Society of Farm Women Group No 3 met recently at the home of Mrs Willie D Stober, Adamstown, with the meeting theme "Cooking Surprises"

Mrs Harry Usner demonstrated the making of a perfect Cherry Crumb Pie Other food demonstrations were by Mrs Stober — Hot Barbecued Chicken Sandwiches, and Mrs Robert Gregory—Salads

Miss Mary N Royer demonstrated arrangements of various flowers and containers and there was a plant exchange

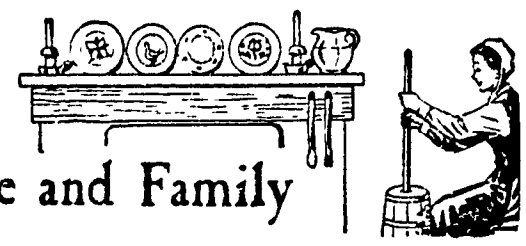
Mrs William B Eberly conducted the business session. The Group will sew at Ephrata Hospital this week, it was announced Mrs William Eberly, Mrs Ivan Eberly, Mrs John Edwards, Mrs Gilbert Paul, Mrs Elam Shelly, and Mrs Harry Usner will attend the Spring Rally at Dillsburg

A bus trip May 20 to Peddlers' Village and the Flemington Cut Glass Co is planned It will leave Lincoln at 7 a m

The Group will manage the hot dog and hamburger stand May 19 for the annual Lawn Fete at the Ephrata Community Hospital

During the social period following the meeting, members tasted the food demonstrations

Because of the scheduled bus trip, the next meeting will be held one week earlier than usual, May 13



For the Farm Wife and Family

Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist

THOMAS

Wise To Check Temperature In Home Freezer Often

Temperature in your home freezer may vary as you put more food into it

To maintain the best quality of the foods stored in the freezer, the temperature should be zero degrees fahrenheit or lower

Undesirable changes in flavor, color, and texture may take place in frozen food if the temperature goes above zero degrees

The longer foods are stored in a temperature above zero degrees, the more noticeable these changes become

Proper Lighting Essential For Eye Comfort

For better eye comfort when doing close work, here are some tips that will help assure adequate lighting

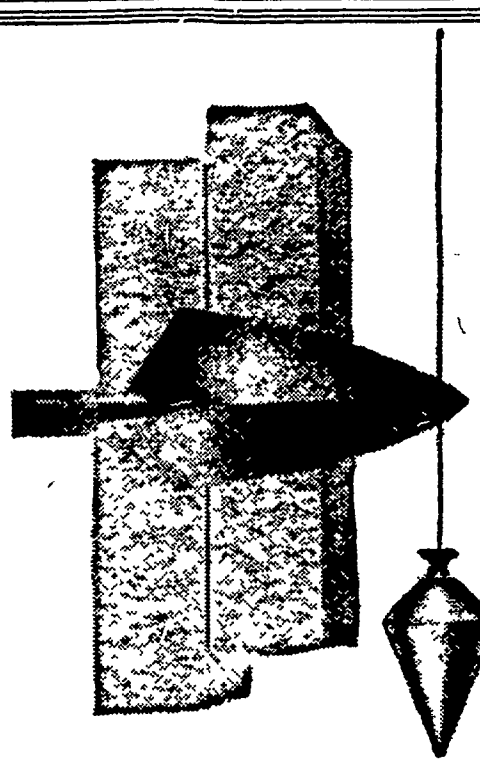
Diffused light is spread evenly over the entire work area

Shadows from hands and body are not falling on the work area

Light bulbs are not in direct view or causing glare spots

Desk surfaces and back walls are light-colored or non-glossy to lessen discomfort from contrasts

Walls and ceiling have light thrown on them in addition to the work area



HOLLAND STONE

a luxury you can afford)

Inside, outside, you'll find the rich quarried look of HOLLAND STONE adds a touch of real elegance to your building designs. And yet, HOLLAND STONE is one of the most economical building materials today. Its unique versatility in size and shape lends a structural freedom to builders, meeting new ideas, as well as cost problems. Comes in a wide choice of naturally warm, distinctive colors, plus Colonial white.

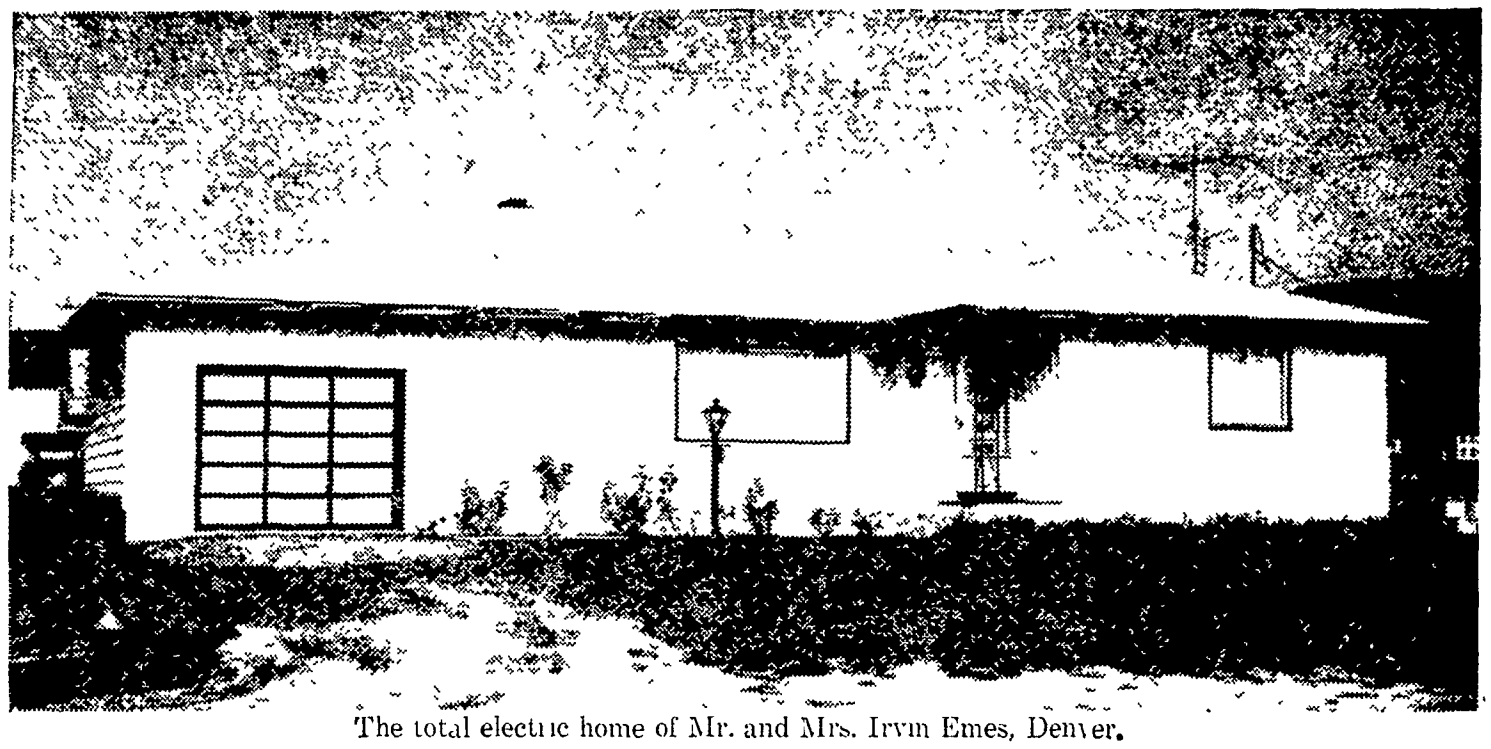
Esbenshade Turkey Farm
"America's Oldest"
PARADISE, PA.



The total electric home of Mr. and Mrs. Irvin Emes, Denver.

We asked the Irvin Emes family:
Is total electric living as low-cost as we promised?
Their answer:
Yes! We paid just $25.65 a month last year for everything, *including* electric heating!

This low cost also included electric water heating, cooking, laundering, lighting, and all their other electric services.

That's why we say, to make a true comparison of the total costs of home heat and operating all your work-saving appliances, you must add together *all* costs.

With total electric living, for instance, there's just one service, one bill and no expensive maintenance contracts. But to get the true cost of flame-type heat, you must add together the fuel bill, the electric bill and the service contract. Put them all together and you'll see why we say live the total electric way as the Emes family does.

IF YOU ARE BUILDING — be sure to tell your builder you want to be modern, you want the best, you want electric heat.

IF YOU ARE REMODELING — call a Reddy Kilowatt Recommended Electric Home Heating Dealer for an estimate. He is listed in the Yellow Pages under "Heating Contractors."

FULTON GRANGE NOTES GRANGE WEEK APR. 17-23

Fulton Grange #66 held its bi-monthly meeting at Oakryn April 10. Chester A. Todd, Jr. presided at the business meeting, and the young people filled all officers' chairs.

The Home Economics Committee reported having served 495 turkey suppers April 8. The Hobo Show has been postponed until fall, it was announced.

Fulton Grange observed "Grange Week" April 20 by holding a special meeting to receive membership applications. Both teams made new gains, the "Peapickers" team being in the lead again. There will also be degree rehearsal for all the officers.

Mrs. Stanley Stauffer, Jr., Youth Lecturer, presented the program: Mrs. Richard Holloway read Governor Raymond P. Shafer's Proclamation of Grange Week for April 17-23. The Mt. Sinaii African United Methodist - Episcopal Church choir of Arcadia sang several numbers accompanied by Mrs Paul Cevis. Henry Springer, Fairmount, gave an interesting chalk talk entitled "Be Prepared" and sang a solo accompanied by Mrs. Herman Welch Mrs. Jesse Wood gave a reading "A Deck of Cards", and Mrs. Stanley Stauffer, Jr conducted a stunt.

First and Second Degrees will be conferred at the next regular meeting of Fulton Grange April 24 and Third and Fourth Degrees will be conferred May 8. There will also be a scrap drive at that meeting for the benefit of Scout Troop #330.

4-H NEWS

DRUMORE CLUB SEES FILM ON AGRICULTURE CAREERS

by Ronald Lehman, reporter

The Drumore 4-H Club held its second meeting of the year Tuesday evening, April 18, at the Chestnut Level Church House.

The meeting was attended by approximately 15 members, most of them new to the club.

Entertainment was supplied by a movie on agriculture and its opportunities, entitled "Dynamic Careers". Refreshments were supplied by Linda DeLong, vice president.

The officers of the club are as follows: president, Mary Douts; vice president, Linda DeLong; secretary, Donna Krantz; treasurer, Wayne Lefever; reporter, Ronald Lehman; song leader, Richard Powl; game leaders, Alice Lehman and Pamela Lewis, county council representative, Linda DeLong.

The next meeting will be held Tuesday, May 16, at the Church House

GARDEN SPOT ELECTS TOM HOUSER PRESIDENT

by Lynn Royer, reporter

Tom Houser, Lampeter, was elected president of the Lancaster County Garden Spot 4-H club at an organizational meeting Tuesday evening, April 18, at the Smoketown Elementary School

Other officers elected were vice president, Averril Royer, 2025 Oregon Pike, secretary, Jay Weaver, 475 Mt Sidney Rd; assistant secretary, Jeffrey Risser, Leola R1, treasurer, Ken Risser, Leola R1, game leaders, Susan Ruhl, 2425 Old Philadelphia Pike, and Dale Weaver, 475 Mt Sidney Rd, song leader, Philip Ruhl, 2425 Old Philadelphia Pike; and reporter, Lynn Royer, 2025 Oregon Pike

County Council representatives are Averril Royer and Jim Landis, 143 Pitney Road

HOSSLER, NESTLEROTH REVERSE OFFICES IN ELM-PENRYN 4-H CLUB

by Dale Ulrich, reporter

Members of the Elm-Penryn 4-H Community Club voted at a meeting Monday night at the Penryn Fire Hall to reverse the top office holders they elected at the reorganization meeting on March 20.

It was decided that vice president Nancy Nestleroth would serve as president for the coming year, and president Mike Hossler would become vice president.

The 14 members present received their project books, and games were enjoyed by everyone.

The next meeting will be held May 15, at which time a film will be shown.

P B GUERNSEY SALE

Thursday, April 27, 1967 — 12:30 Noon
At the Ass'n. Sales Pavilion, Lancaster, Pa.
49 HEAD
4 BULLS — 30 COWS — 6 BRED & 9 OPEN HEIFERS
30 will be recently fresh by sale date.

A few of the bred heifers due later in the fall.

We can honestly say that never before did we offer cattle with such outstanding records and pedigrees in any of our sales.

Four top bulls, three by "Nance". Dam's records over 21,000#M on one, another with 5 class leading records, one over 18,000#M, another over 16,000#M as a 3 year old. A "Top Command" son, dam with over 13,600#M.

On the females, many have records seldom equaled in the breed.

This sale follows two large dispersals in Penna., and the weather may be tempting to go out in the field to do spring work. Those who take time out to come to the sale, we predict will get the years' best bargains.

SALE MANAGED BY:
PENNA. GUERNSEY BREEDERS' ASS'N.

● Grangers

(Continued from Page 1)

The Grangers stated that, although they were not against changing some of the provisions of the Pennsylvania Constitution, they favored it be done by amendment rather than by a convention.

It was observed in the Grange resolution that the cost of holding a convention would possibly run to three-quarters of a million dollars, and that the job of updating the document could be done more economically, and as satisfactorily, by the General Assembly

It was resolved that Grangers should urge everyone to vote against holding such a convention

RETAIN JP'S

The Pomona Grange members also resolved that the move to abolish the role of Justice of the Peace in Pennsylvania be opposed.

It was stated that abolition of this branch of the minor Judiciary would work a hardship on all rural people and on patrolmen operating in rural areas

The spring program was presented by Miss Helen Wanner, Lecturer. She conducted a Grange centennial candle-lighting ceremony with the Pomona Master, Lecturer and Chaplain, Miles Cochran, taking part.

Alfred Wanner, Jr., who attended the American Institute of Cooperation held at Colorado State University last summer, gave an illustrated talk on his activities there. Mr. and Mrs. Chester Eby presented a skit on "Marital Mishaps".

The next meeting will be a picnic at Quarryville Memorial Park on August 19, at 7 p.m. Colerain Grange will be host.

Any man's reputation is a mixture of what his friends and his enemies say about him behind his back.

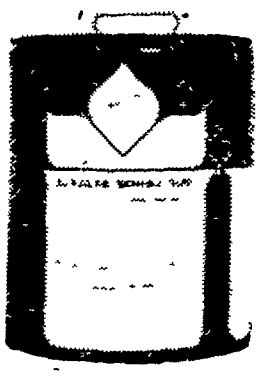
Agway

Alfalfa-Spray 22 E



Leafhopper

Alfalfa Weevil

Spittlebug

Gets them all without the fear of residues in milk

It's the spray that thousands of Northeastern dairymen used last year Agway Alfalfa Spray 22E is a convenient, ready-to-use liquid formulation of Du Pont Methoxychlor plus malathion, and is highly recommended for the weevil and other pests.

Ask your AGWAY man for 22E again this year and "play it safe/spray it safe".

We also can apply alfalfa spray with our 4 wheel drive truck.
